

Valyrian Systems Inc.

***Pioneering the Future of
High-Performance
Network Solutions***

CoreBalance-100

Core Traffic Manager

All in one solution for dynamic bandwidth management, load balancing, and QoS enforcement, optimizing network performance for Telcos and ISPs.

Unique Capabilities and Features

Implements time and event-based policies for automated traffic optimization and control.

Enables seamless application throttling to prioritize critical applications efficiently.

Provides CDN and cloud-based application visibility for effective planning and optimization.

About VSi

Harnessing cutting-edge technologies, VSI has developed a proprietary Extreme Packet Processing (XP²) Engine. This groundbreaking development empowers VSI to provide superior network intelligence at speeds exceeding 100Gbps, setting an exceptional standard for efficiency in the industry. VSI products enable Telcos, mobile operators, Law Enforcement Agencies, and commercial enterprises with unmatched capabilities to safeguard, monitor, lawfully intercept, manage, prioritize, and analyze internet traffic in real-time.
